We'll build another CP&L by 1977.

We'll build another electric system the size of our present one by 1977.

The reason? To keep ahead of the demand for electric power, which has been doubling about every six years in our area.

Because of electricity's important role in our daily lives and in helping solve many of man's greatest problems - in environment, medicine and education to name a few - we must build and expand.

We have a commitment to you. And we are working hard to keep it.
